

Sprinkler Subsidiary Stop Valves Management System 消防商會花灑分層閘掣管理系統(SSSVMS)

Description

The Sprinkler Subsidiary Stop Valves Management System (SSSVMS) has been designed by the FSICA to comply with the recommendation on the Hong Kong Fire Services Department Circular Letter No 4 /2010 dated 27 September 2010. The FSICA SSSVMS offers a unique feature which assists the Registered Fire Services Contractors and Property Management companies to prevent the mis-operation of the subsidiary valves and provides monitoring on any irregularities so that they can be rectified in a timely manner.

消防處為防止花灑分層閘掣遭受干擾或不慎關上，於 2010 年 9 月發出消防處通函第 4/2010 號，強烈建議採用「花灑分層閘掣管理系統」(SSSVMS)。

消防處特此與消防商會(FSICA)經多個月的共同商討及研究，確立了一套：除由消防裝置承辦商安裝繫穩裝置外，並要求物業管理公司作出相應措施的管理系統。

消防商會花灑分層閘掣管理系統整套組合包括：
